Product Requirements Document (PRD)

Product Overview

Product Name: (TBD – Gaming Community Platform)
Purpose: To provide a dedicated platform for gamers to connect, form teams, and build meaningful in-game and real-world relationships.
Target Audience: Gamers of all ages and skill levels seeking social connection, team formation, and community engagement within the gaming ecosystem.

Problem Statement

Gamers often struggle to find compatible teammates, form lasting friendships, and engage in meaningful communities both in-game and beyond. Existing solutions are fragmented, lack personalization, and do not foster long-term bonds.

Goals & Objectives

- **Facilitate meaningful connections** between gamers based on interests, play style, and goals.
- **Enable team formation** for casual and competitive play.
- **Foster a safe, inclusive, and engaging community** that extends beyond individual games.
- **Support real-world meetups and events** to strengthen bonds.
- **Provide tools for content sharing, communication, and collaboration.**

Key Features

1. User Profiles & Onboarding

- Gamer-centric profiles: gaming history, favorite genres, skill level, platforms, and social links.
- Personality and play style quizzes for better matchmaking.
- Customizable avatars and profile themes.

2. Matchmaking & Team Formation

- Intelligent matchmaking based on preferences, skill, and availability.
- Team creation tools for both casual and competitive play.
- LFG (Looking For Group) boards and event scheduling.

3. Communication Tools

- In-app chat (text, voice, video) for individuals and groups.
- Integration with popular gaming communication platforms (e.g., Discord).
- Moderation tools and reporting features for safety.

4. Community & Social Features

- Interest-based groups and forums.
- Event creation and RSVP (online tournaments, LAN parties, meetups).
- Content sharing: clips, screenshots, guides, and achievements.

5. Gamification & Rewards

- Badges, leaderboards, and achievements for community engagement.
- Reputation system to encourage positive behavior.

6. Real-World Integration

- Tools for organizing and promoting real-world events.
- Location-based features for local meetups.

7. Platform & Accessibility

- Mobile app (iOS & Android) and responsive web platform.
- Accessibility features for inclusivity.

User Stories

- As a gamer, I want to find teammates who match my skill level and play style so I can enjoy games more.
- As a community organizer, I want to create and promote events to bring gamers together.
- As a new user, I want an easy onboarding process that helps me connect with like-minded players.
- As a competitive player, I want to form teams and participate in tournaments.
- As a content creator, I want to share my gaming highlights and connect with fans.

Success Metrics

- Number of active users and daily engagement rates.
- Matchmaking success rate and user satisfaction.
- Growth in community-created events and groups.
- Retention rates and average session duration.
- Positive feedback and reputation scores.

Technical Requirements

- Scalable backend infrastructure for real-time communication and matchmaking.
- Secure authentication and data privacy compliance.
- Integration with third-party gaming APIs and communication tools.
- Moderation and reporting systems for user safety.

Roadmap (High-Level)

1. **MVP Development**
   - User profiles, matchmaking, basic chat, and team formation.
2. **Community & Social Features**
   - Groups, forums, event tools, and content sharing.
3. **Mobile App Launch**
   - iOS and Android apps with core features.
4. **Advanced Features**
   - Gamification, real-world integration, and expanded communication tools.
5. **Growth & Partnerships**
   - Marketing, influencer partnerships, and expansion into new regions.

Stakeholders

- **Founders & Core Team**
- **Investors**
- **Mentors/Advisors**
- **App Developers/Tech Co-Founders**
- **Early Adopter Gamers & Community Leaders**

Risks & Mitigation

- **User Safety:** Implement robust moderation and reporting.

- **Market Competition:** Focus on unique features and community-driven growth.

- **Technical Scalability:** Use cloud infrastructure and modular architecture.

Appendices

- Detailed feature roadmap (available upon request)

- Wireframes and UI mockups (available upon request)

- Pitch deck and business model (available upon request)
